

## **ASTRA International Engineering Ltd. , Croatia**

**Project: Revamping of the ASTA building in Zagreb**  
(Ref list item 16)

**Purchaser: ASTRA International Inc.**

We have performed:

- design and consulting
- delivery of equipment
- installation works
- start up and commissioning

for the revamping of the 6 floor ASTRA office building in Gajeva street in the very centre of the city of Zagreb.

Total revamped area 1,300 sqm. Building was built in 1930's by Anglo-Croatian oil company as one of the masterpieces of the famous architect Lubinsky (National library). Due to the fact that building is protected as architectural monument we had to follow very strict rules regarding keeping all artefacts in their original form. Also it,

since building is the centre of town, we managed to keep environment from any negative influence from dust and noise.

Complete job was done in 70 days without moving employees from building due to the precise planning on the daily base.

In our contract we have done the following:

- Civil works – demolition and repair of walls and ceilings
- Reconstruction of all doors and windows
- Complete reconstruction of 17 rest rooms (ceramics, tiles, sewage and water piping, heating)
- Air conditioning
- Complete new electrical installation and lighting system
- Revamping of wooden floors
- Extension of telephone and computer installation

All works were finalised  
in contracted period and  
successfully handed over  
to the Client
